

# EXCELLION

Power for life-changing technology.

## **Working Student & Internships (f/m/d) - General Application for all Roles**

### **About us**

Hi, we are Excellion! Thanks for being here!

We are passionate about a green, sustainable future and see technology as the way to achieve it. To reach this goal, we have the mission of enabling the next generation of aviation and space missions for which we design, build, and test the best battery systems out there. Our team is growing and we are looking for hands-on support in all areas, including system design, battery testing, researching new markets, and commercialising products.

### **About you**

You are passionate about what you do? You want to apply your skills in a fast-paced, constantly changing environment? You want to take responsibility for your tasks? Then we are want to get to know you!

In general, our ideal candidate looks something like this:

- Currently enrolled in a Bachelor's or Master's degree program
- Strong analytical and problem-solving skills, with a motivation to learn
- Fluency in English (German is a plus)
- Passion for what you do!

## Your tasks

We are an early stage startup, so tasks change rapidly and tend to be very diverse! Blow up a battery during a test on Monday? Analyse a business opportunity and work with customers on Tuesday? Represent Excellion at a fair on Wednesday? That might not be too far fetched!

We are currently looking for the following roles (details can be found by clicking on the respective link):

- Founders Associate (working student): <https://tinyurl.com/excellion12>

## What you can expect

We want to support you in learning as much as possible while you strongly influence our journey! We have a very broad range of tasks ranging from in-depth engineering design to onboarding customers, with everything in between, and we want to support you with finding what really interests you while helping us grow!

- Gain practical experience in a hands-on, early stage startup environment
- Leave your mark by influencing the trajectory of the entire company with your work
- Professional development with the founders with regular, open feedback
- Flexible work schedule to accommodate university work
- Competitive compensation, regular social events and a dynamic startup working atmosphere

The button below takes you to our application form! The entire process takes approx. 25 min for business roles, and 40 mins for engineering applications. Thank you for taking the time!
